REMARKS

25X1X

1. No Soviet or Polish military units were stationed in Zychlin (Q 53/P 09) prior to June 1950. No barracks installations were available there.
2. A military guard detail of 25 to 30 men was located in the Brown-Boveri Factory, which manufactured electrical equipment, allegedly for the Polish Armed Forces. The soldiers seen there wore red service color on their collar patches and on the pipings of their trousers. Another guard detail with grey-blue uniforms was stationed at the local sugar refinery.
3. No Soviet or Polish military units were stationed in Zelow (Q 52/O 70). No Soviets were observed in this area after the fall of 1945.
4. A barracks installation, gutted during the war, was located on ul. Krutka at the northeastern edge of the town. This installation had not been repaired by early April 1950.
